

Code is a team nomination. Its subject area includes wireless and fixed networks, smartphone, data centers, virtualization, cloud, apps, video surveillance systems etc.

Huawei Russian Research Centers provide Huawei marathon matches. Subject area of matches includes wireless and fixed networks, smartphone, data centers, virtualization, cloud, apps, video surveillance systems etc. Within the Code nomination, participants are encouraged to try their hands in solving the Huawei marathon matches tasks.

The Code Nomination aim is to find talented researchers for:

- Construction of mathematical models
- Formulation of new and searching methods of solving the existing problems
- Programming (Matlab, C++, Python, FPGA etc)

Code is team nomination from 1 to 3 people in the team. The work assumes research activity. It's important to set ourselves tasks independently, to determine the prospects of methods for solving these problems. English language can be developed during participation in Huawei Marathon Matches.

The link for registration, as well as information about the Huawei marathon matches' schedule, rules, evaluation of results and prizes will be published later.

Participation in the project opens new educational and career opportunities for students and educational institutions. You can learn about the development prospects for students with Huawei here.

Attention: By participating in this nomination, you acknowledge the agreement with the terms of participation and copyright provisions.

Conditions for participants and Copyright

We can accept results of participants with age started from 14 years old. Consent of parents or other legal representatives of the minor participant of tournament on alienation of intellectual property rights on the specified below conditions is presumed.

The organizer has the right to change the schedule of the match and disqualify participants: who provided incorrect information during registration; participants who have a personal contract with the Huawei, relatives and members of their families; participants who use plagiarism.

In accordance with the relevant laws and regulations, Huawei believes that the participants have made the following non-refundable statements about the decisions sent during the tournament:

The presented solutions are original and the participants of the match do not violate any intellectual rights, such as the rights to the results of intellectual activity, copyright and trademark. The solutions presented have not been published in any media, such as Newspapers, magazines and websites, including open source communities. The presented solutions have no patents and are not copyrighted, have not been presented at other tournaments, have not been put into production. Match participants ensure that they have never participated in other tournaments with the solutions presented. Otherwise, Huawei has the right to disqualify the participant at any stage of the match and has the right to carry out the necessary legal actions. The copyright for the solutions of the participants is transferred to Huawei and the company has the right to: modify, sell, demonstrate, publish, promote and open the source code of the solution.

Participants are responsible for all disputes arising about rights, reputation, privacy, trademarks and copyrights.
